

Press Release

BCC Buildtech Limited

December 31, 2025

Ratings

Instrument / Facility	Amount (Rs. crore)	Current Ratings	Previous Ratings	Rating Action	Complexity Indicator
Long Term Bank Facilities	22.00	IVR BBB+/ Stable (IVR Triple B Plus with Stable outlook)	-	Rating Assigned	Simple
Short Term Bank Facilities	88.00	IVR A2 (IVR A Two)	-	Rating Assigned	Simple
Total	110.00 (Rupees One Hundred and Ten Crore Only)				

Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are at Annexure 2. Detailed explanation of covenants is at Annexure 3.

Detailed Rationale

The ratings assigned to the bank facilities of BCC Buildtech Limited (BCC) derive comfort from its proven project execution capability under the guidance of an experienced management team, a healthy order book providing revenue visibility over the near to medium term and satisfactory business performance of the company marked by sustained growth in both scale of operations and profitability. The ratings are further supported by the company's healthy financial risk profile reflected in a comfortable capital structure and satisfactory debt protection metrics. However, these strengths are partially offset by exposure to geographical, project execution and sectoral concentration risks, vulnerability of profit margins to volatility in input prices and inherent risks associated with the construction sector, including sizeable non-fund-based exposures.

The stable outlook reflects expected stable business performance of the company on the back of satisfactory order book position underpinned by its healthy past track record in project execution supported by experienced promoter.

Key Rating Sensitivities:

Upward Factors

- Growth in scale of operations on a sustained basis and consequent improvement in profitability
- Sustenance of capital structure with improvement in debt protection metrics.

Downward Factors

Press Release

- Moderation in scale of operation and/or profitability on a sustained basis.
- Deterioration in working capital cycle impacting the liquidity profile of the company.

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

- **Experienced management**

Mr. Bhoop Singh, the managing director of the company, is at the helm of operations of the company. He has over two decades of experience in the relevant industry by virtue of BCC being in the business since 2003. The company will continue to get benefitted from his strong understanding of market dynamics and healthy relations with government departments and raw material suppliers.

- **Proven project execution capability**

Over the past years, BCC has successfully executed many projects across the Northeast region in a timely manner. The repeat orders received from the Government Departments validate its construction capabilities.

- **Satisfactory business performance with sustained growth in scale of operation and profitability**

The total operating income (TOI) of the company has increased at a CAGR of ~71% over the last three fiscal years from Rs.90.50 crore in FY23 [FY refers to the period from April 1 to March 31] to Rs.190.93 crore in FY24 and further to Rs. 265.97 crore in FY25 on account of timely execution of higher orders. Driven by higher revenue, the profit levels have also increased over the aforesaid period. The company has maintained a healthy profitability over the years mainly on the back of high margin order execution being operating in North-eastern part of India. EBITDA margin and PAT margin have increased from 16.40% and 6.34% respectively in FY24 to 20.72% and 12.63% in FY25 respectively supported by higher margins fetched from two orders of NHAI and NHIDCL. Aided by sustained growth in profitability, net cash accruals of the company have also expanded gradually from ~Rs.12 crore in FY23 to ~Rs.38 crore in FY25. In H1FY26, the company has achieved a revenue of ~Rs.165 crore (~Rs.144 crore in H1FY25).

- **Healthy order book position with revenue visibility in the near to medium term**

Press Release

As on November 30, 2025, BCC has unexecuted orders of ~Rs. 867 crore (~3.26 times of FY25 revenue), which is to be executed within the next two years. All the contracts are from government and semi-government entities which indicate minimal counterparty risk.

- **Healthy financial risk profile marked by comfortable capital structure with satisfactory debt protection metrics**

The capital structure has remained comfortable marked by net worth (ATNW) of Rs.59.67 crore as on March 31, 2025. The company has reduced its debt level by prepaying ~Rs.17.55 crore of term loan from internal accruals in FY25. With decrease in debt level and increase in net worth on account of accretion of profit to reserves, the long-term debt equity ratio and overall gearing ratio stood at 0.36 times and 0.42 times respectively as on March 31, 2025 against 1.61 times and 2.08 times respectively as on March 31, 2024. Total indebtedness of the company as reflected by TOL/ ATNW also improved from 4.11 times as on March 31, 2024 to 1.57 times as on March 31, 2025. Over the years the company has maintained a healthy debt protection metrics underpinned by its healthy profitability. Debt protection metrics as indicated by interest coverage ratio improved from 9.67x in FY24 to 11.96x in FY25 on account of increase in EBITDA. Furthermore, with reduction in debt level and increase in profit levels and accruals, Total debt to EBITDA and Total debt to NCA improved from 1.78 times and 2.33 years respectively as on March 31, 2024 to 0.45 times and 0.65 years respectively as on March 31, 2025. DSCR of the company also remained strong over the past three fiscal years owing to minimal debt repayment obligations as compared to net cash accruals of the company. Infomerics expects that the financial risk profile of the company will continue to remain healthy in the near to medium term.

Key Rating Weaknesses

- **Exposure to geographical, project execution and sectorial concentration risk**

~50% of the unexecuted orders of the present order book is majorly skewed towards civil construction in the states of Northeastern part of the country from various government departments indicating a geographical and sectorial concentration risk. However, the company has adequate experience of executing projects in this region which provides comfort. Further, company also has presence in other states mitigating geographical concentration risk to some extent. The company is also exposed to execution risks in construction contracts, with nearly ~78% of its unexecuted order book in the nascent stage of execution with minimal work started or just declared L1 as on November 30, 2025.

Press Release

- **Susceptibility of profit margins to input price fluctuations**

The company's profit margins are exposed to raw material (mainly steel, cement, sand and other metals) price fluctuations. Nonetheless, the presence of a price escalation clause mitigates the risk to an extent.

- **Risks associated with construction sector including sizeable non-fund-based exposure**

BCC is exposed to the cyclical nature inherent in the construction industry such as slowdown in new order inflows due to macroeconomic factors, risks of delays in execution, intense competition in the tender-based contract award system resulting in the risk of volatility in order inflows, revenues, and pressure on profit margins. However, its long presence and established relationships with clients provide comfort. Further, BCC is exposed to contingent liabilities in the form of Bank Guarantees, mainly towards performance guarantee, mobilisation advances and security deposits. Nonetheless, Infomerics draws comfort from BCC's healthy execution track record.

Liquidity – Adequate

The company has generated net cash accruals of Rs. 38.42 crore in FY25. Furthermore, the liquidity position of the company is expected to remain adequate as expected cash accruals are sufficient to cover the debt repayment obligations in the near term. Moreover, the company has satisfactory leverage ratios with an overall gearing ratio of 0.42x as on March 31, 2025, indicating a comfortable gearing headroom. The average fund based working capital limit utilisation for the last 12 months ended October 2025 stood at ~44% suggesting strong liquidity buffer.

About the Company

Press Release

BCC Buildtech Limited (BCC) was established as a proprietorship firm in the name of 'Bharat Construction Company' in 2003 by Mr. Bhoop Singh. Later, in 2023, it was reconstituted as a private limited company and in 2025, the constitution was changed to public limited company. The company is engaged in various civil construction activities like construction of roads, highways, buildings, structure work, etc for various clients such as MORT&H, NHAI, NHIDCL, PWD, etc. Presently, BCC is executing highway works for NHAI in North-East region and Ayodhya, MPRDCL in Madhya Pradesh and NHIDCL in Assam.
